SUMMARY

Assistant Manager, Distribution & Operations at Atica Global, combining US hotel sales operations with workflow automation and analytics. Since 2025, built four internal tools (n8n, Appsmith, Excel) and SQL/Metabase dashboards used by Operations and Sales teams. Manages seven direct reports and owns Operations-side UAT for Product and Tech releases.

SKILLS

Automation & Tools: n8n, Appsmith, REST APIs, Google Maps API, AI-assisted workflows, web scraping, Replit

Data & Analytics: SQL (PostgreSQL), Metabase, Excel, Google Sheets, dashboards, KPI and SLA tracking, data validation

Business Systems: Salesforce, Jira Service Management, Slack, LeadSquared, Lemlist, ZoomInfo

Product & Operations: UAT, requirements gathering, workflow design, SLA/TAT management, people management

PROFESSIONAL EXPERIENCE

Atica Global — Pune, India

Assistant Manager – Distribution & Operations — Jan 2026 – Present

- Manage seven direct reports (grown from five in 2026): daily work allocation, SLA and turnaround tracking, quality checks, escalation handling and performance reviews.
- Launched an Appsmith lead-generation tool (Google Maps API) that finds businesses near a hotel by radius, industry and operating status, connected to a scraping workflow that collects public contact details into a tracking sheet. Took it from build to production in Feb 2026; now used by Sales and Operations for prospecting.
- Automated channel activation with an n8n workflow (built in a month, live since May 2026) that sends AI-drafted onboarding emails to up to 10 booking channels from one form, logs every send and follow-up, and alerts owners on Slack. Cut activation time from 10–15 days to 2–3 days and replaced manual status checks with a live tracker.
- Designed a Group Pricing Calculator with the Revenue team and senior management, using five years of occupancy, ADR, STR and comp-set data to recommend group rates; reached 90%+ rate accuracy in the pilot before handover to Tech for internal tool development (Apr 2026).
- Built SLA, task management and exception dashboards in SQL/Metabase, including a tracker that joins three data sources to flag missing Salesforce booking data; own Operations-side UAT for Product and Tech releases.

Senior Operations Analyst — Jul 2025 – Dec 2025

- Built and launched an end-to-end n8n email RFP automation that separates actionable RFPs from other mail, sets urgency and response windows, creates the Salesforce task and alerts the assigned associate on Slack. Built and tested in two months, live since Oct 2025 for 20+ associates; missed-email escalations fell from about 30% to 2–5%.
- Managed 10+ high-sensitivity properties, including Marriott and Hilton, with zero client escalations across every property handled from Oct 2024 to Dec 2025.

Distribution & Operations Executive — Oct 2024 – Jun 2025

- Managed RFP submissions and lead pipelines for 25+ US hotel properties, supporting $650,000+ in revenue.
- Led a three-person pod and cut average RFP turnaround from 18 to 4 hours through process changes and coaching.
- First on the team to work out and implement Hilton’s Local Negotiated Rate (LNR) creation process; built 15+ LNRs.
- Mined 3,500+ leads and created 50+ group blocks across hotel property management systems.

Sales & Operations Intern — Jul 2024 – Sep 2024

- Mined leads via Google, Metabase and ZoomInfo, managed them in LeadSquared and Lemlist, ran RFPs for 6 hotels.

AWARDS

Trailblazer Award – Atica Global CTO, for building the first production automation tools in Sales & Operations — Dec 2025

EDUCATION

BBA (Information Technology) | Lovely Professional University | CGPA 6.84/10 — 2021 – 2024
