SUMMARY

Assistant Manager, Distribution & Operations at Atica Global, combining US hotel sales operations with workflow automation and analytics. Built four internal tools (n8n, Appsmith, Excel) and SQL/Metabase dashboards, and was a core Operations member on SARAH, an RFP automation product live on 200+ properties. Manages seven direct reports.

SKILLS

Automation & Tools: n8n (JavaScript code steps), Hyperbrowser, Appsmith, Google Maps API, REST APIs, AI workflows

Data & Analytics: SQL (PostgreSQL, CTEs, joins), Metabase, data modeling, KPI and SLA reporting, Excel, Google Sheets

Business Systems: Salesforce, Jira Service Management, Slack, LeadSquared, Lemlist, ZoomInfo

Product & Operations: UAT, requirements gathering, workflow design, SLA/TAT management, people management

PROFESSIONAL EXPERIENCE

Atica Global — Pune, India

Assistant Manager – Distribution & Operations — Jan 2026 – Present

- Manage seven direct reports (grown from five in 2026) on work allocation, SLA tracking, quality and escalations; own Operations-side UAT for Product and Tech releases.
- Launched a lead-generation and contact enrichment tool: an Appsmith front end finds businesses near a hotel through the Google Maps API, and an n8n backend crawls their websites with Hyperbrowser, parses contact details in JavaScript and writes them to a tracking sheet, with Slack alerts on errors. Live since Feb 2026 for Sales and Operations.
- Automated channel activation with an n8n workflow (built in a month, live since May 2026) that sends AI-drafted onboarding emails to up to 10 booking channels from one form, logs every send and follow-up, and alerts owners on Slack. Cut activation time from 10–15 days to 2–3 days and replaced manual status checks with a live tracker.
- Designed a Group Pricing Calculator with the Revenue team and senior management, using five years of occupancy, ADR, STR and comp-set data to recommend group rates; reached 90%+ rate accuracy in the pilot before handover to Tech for internal tool development (Apr 2026).
- Built four Operations dashboards in SQL/Metabase (150+ charts) where no reporting existed: RFP and ticket volumes, turnaround and 4-hour SLA compliance by associate, channel and task type, plus ageing and breach views.
- Unified Salesforce tasks and Jira tickets into one SQL model with a working-hours SLA clock; matched pricing-request records to Salesforce opportunities to split turnaround across Sales Ops, Revenue and post-revenue stages.

Senior Operations Analyst — Jul 2025 – Dec 2025

- Built and launched an end-to-end n8n email RFP automation that separates actionable RFPs from other mail, sets urgency and response windows, creates the Salesforce task and alerts the assigned associate on Slack. Built and tested in two months, live since Oct 2025 for 20+ associates; missed-email escalations fell from about 30% to 2–5%.
- Core Operations member of the cross-functional team (Tech, Revenue, Sales) behind SARAH, an n8n product that finds new HotelPlanner RFPs, gets rates from the pricing model or Revenue, submits the proposal and emails stakeholders. Wrote the BRDs and process maps; live on 200+ properties, cutting RFP turnaround from 24+ to 2–4 hours.
- Managed 10+ high-sensitivity properties, including Marriott and Hilton, with zero client escalations across every property handled from Oct 2024 to Dec 2025.

Distribution & Operations Executive — Oct 2024 – Jun 2025

- Managed RFP submissions and lead pipelines for 25+ US hotel properties, supporting $650,000+ in revenue.
- Led a three-person pod and cut average RFP turnaround from 18 to 4 hours through process changes and coaching.
- First on the team to work out and implement Hilton's Local Negotiated Rate (LNR) creation process; built 15+ LNRs.
- Mined 3,500+ leads and created 50+ group blocks across hotel property management systems.

Sales & Operations Executive – Intern — Jul 2024 – Sep 2024

- Mined leads via Google, Metabase and ZoomInfo, managed them in LeadSquared and Lemlist, ran RFPs for 6 hotels.

AWARDS

Trailblazer Award – Atica Global CTO, for building the first production automation tools in Sales & Operations — Nov 2025

EDUCATION

BBA (Information Technology) | Lovely Professional University | CGPA 6.84/10 — 2021 – 2024
